Experience

European Investment Bank, Research Intern

- My role is to collaborate on a research project investigating the impact of grant policies on investments and the broader economy. Our study is primarily intended for the Annual Investment Report, as well as for peer-reviewed journal publication. Additionally, I assist the department's economists with various ad hoc tasks.

Luxembourg, Luxembourg
March 2025 to Aug. 2025
6 months

International Monetary Fund, Summer Research Intern

- My project was titled "Monetary transmission in a fragmented uncertain world" in the Strategy, Policy, and Review department's Macro Policy division.
- In this paper we investigated how economic uncertainty impacts the monetary transmission mechanism using Threshold VAR models estimated with sign restrictions across various countries.
- We found that in times of high uncertainty, monetary shocks are followed by a larger and longer-lasting contraction of output, than in normal times. However, our results show no significant difference in the reaction of inflation rates, indicating that uncertainty increases the cost of reducing inflation. Our results also suggest that more extreme levels of uncertainty amplify this effect.

Washington D.C., USA June
2023 to Sept. 2023
3 months

Ministry of Finance, Tax Policy Analyst

- I was part of the team responsible for reporting on personal income taxes, social security contributions, as well as the lump-sum tax of small entrepreneurs. My key responsibilities were:
 - Forecasting monthly tax revenues.
 - Management of tax return data.
 - Microsimulation-based analysis of policy scenarios
 - Writing staff-notes
